

# Karicare<sup>®</sup> Gold+

## KARICARE GOLD+ NUTRITIONALLY SUPPORTS YOUR TODDLER'S IMMUNE SYSTEM.

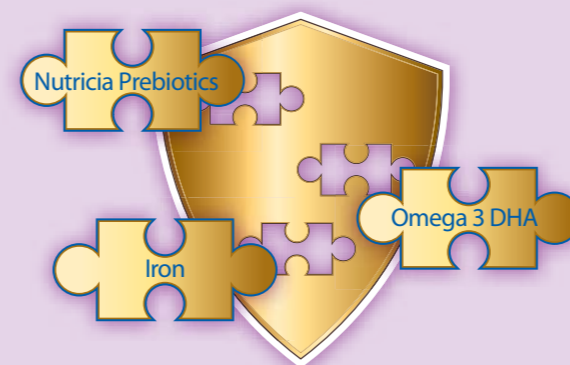

Did you know that between 1 and 3 years of age, your toddler's immune system isn't mature yet. It needs to be supported until they're at least 3. That's why Karicare Gold+ Toddler contains Nutricia Prebiotics, Omega 3 DHA and Iron to nutritionally support their immune system.

Karicare Gold+ Toddler is a premium nutritional supplement specially formulated for active toddlers whose dietary intake may not be adequate to meet their needs. It contains protein, iron and other vitamins and minerals, which are important for healthy growth and development. It also contains Omega 3 DHA which may help support your toddler's eye, brain and nerve development.

Just one cup (200ml) of Karicare Gold+ Toddler provides at least 1/3 of the recommended daily iron intake for a toddler along with Omega 3 DHA and other vitamins and minerals.

Karicare Gold+ Toddler has the added benefit of Nutricia Prebiotics. Prebiotics are special ingredients found in certain foods, vegetables and fruit, such as bananas. They encourage the friendly bacteria in the digestive system to flourish.
